

SYSTEM AND METHOD FOR PRINTING
MULTIPLE POSTAGE INDICIA

ABSTRACT OF THE DISCLOSURE

5 A system and method for printing multiple postage indicia, such as an outbound and/or an associated return postage meter stamp, including a desired postage amount, onto a document or label is described. A processor based system is programmed to interact with a customer to produce the desired postage indicia and to print multiple ones of the indicia substantially contemporaneously. The indicia may include information to allow their use at a later date and/or from a location other than where they are produced.
